**Table 1: Summary of the results of the regression analysis.**

The following table provides a summary of the results of the regression analysis. The dependent variable is the percentage of respondents who reported a positive attitude towards the use of mobile health services. The independent variables are the demographic and attitudinal factors listed in the table. The coefficients and standard errors are reported in the columns labeled 'Coeff.' and 'S.E.', respectively. The t-statistic and p-value are reported in the columns labeled 't-stat.' and 'p-value', respectively. The adjusted R-squared value is reported in the column labeled 'Adj. R-sq.'. The overall F-statistic and p-value are reported in the columns labeled 'F-stat.' and 'p-value', respectively.
